

Claude vs. London Agency

A Cost & Time Comparison — March 2026

In a single week, using one Claude subscription, 3 landing pages and 3 full-stack web applications were built — each integrating Google OAuth, Stripe, Supabase, and deployed via Netlify. Below is an honest breakdown of what a London-based design and development agency would have charged for the same output in 2026.

3 Landing Pages

A professionally designed, conversion-optimised landing page from a London agency typically costs £1,500–£5,000 per page, including design, copywriting, mobile responsiveness, and revisions.

Deliverable	Agency Cost (each)	Agency Cost (x3)	Agency Timeline
Landing Page	£1,500 – £5,000	£4,500 – £15,000	1–2 weeks each

3 Full-Stack Web Applications

Each application included Google OAuth authentication, Stripe payment integration, Supabase as the backend/database, and deployment to Netlify. A customer-facing SaaS product or web app of this complexity built by a London agency in 2026 typically costs £25,000–£60,000 per app at MVP scope, with timelines of 2–4 months each.

Deliverable	Agency Cost (each)	Agency Cost (x3)	Agency Timeline
Full-Stack App (OAuth + Stripe + Supabase + Netlify)	£25,000 – £60,000	£75,000 – £180,000	2–4 months each

Full Project Summary

Deliverable	Agency Cost Estimate	Agency Time Estimate
3 Landing Pages	£4,500 – £15,000	3–6 weeks
3 Full-Stack Apps	£75,000 – £180,000	6–18 months
TOTAL	£80,000 – £195,000	Up to 18 months

The Takeaway

All 6 deliverables were completed in a single week for the cost of a Claude subscription — a fraction of what a London agency would charge. The real value isn't just financial: a traditional agency would still be in discovery meetings and design sprints while these products were already live and deployed.

London agency hourly rates range from £50–£150+ per hour. At those rates, even a conservative estimate of 800 hours across all 6 projects puts the cost at £40,000–£120,000 — before project management overhead, VAT, or revision rounds.

Estimated savings: £79,000 – £194,000 | Time saved: up to 17 months
